

Configuration

1. Add currency column to the ALL PAST ORDERS datagrid
2. Create new controller action that will display a single product title and category name, route path should be **product-and-category/{categoryId}/{productId}**
 - Use **@Route** annotation to describe the route requirements
 - Use **@ParamConverter** annotation to map categoryId to Category entity and productId to the Product entity
 - Use **@Template** annotation to map twig template to this action
3. (optional) use **@AclAncestor** annotation to allow access to the controller only when user have product VIEW permission
