

Security and Access Control Lists: Practice session

- add security section to UserNamingType entity
 - no ownership
- apply ACL resources
 - to controller
 - to both datagrids (types and related users)
 - make sure they work (e. g. manually create role from UI and check)
- (optional) show grid of related users on type view page only if user has VIEW permission for User entity
- (optional) add ACL capability to allow showing of naming information at user view page
