

Security

1. Update the **roundAction** so only logged in users can access it
2. Create custom voter for Oro\Bundle\ProductBundle\Entity\Product entity that will deny **VIEW** of products with sku starting with "2". Result should be checked on the product view page.
3. Create a firewall that will disable all security checks for **^/round** pattern
4. (optional) Hide product with sku starting with "2" from the search results and data grids
